### Confirmation for Dr. Bernhard Heiden

This is to certify that, at his times as a PhD student of Graz University of Technology, Dr. Bernhard Heiden acted as a tutor for the tutorials in the courses Fluid Mechanics and Heat Transfer I and Fluid Mechanics and Heat Transfer II VT at our institute. The courses are parts of the curricula in Mechanical Engineering, Mechanical Engineering – Economics, and Process Engineering. Attendees are students of the fourth and fifth semesters. It is the duty of the tutors, who are typically students of higher semesters, to assist the attendees in solving problems in fluid mechanics and heat transfer presented to them in a written form. The students usually experience difficulties in trying to solve the problems, and the purpose of the tutorials is, with the help from the tutors, to enable the students to overcome the difficulties and enhance consciousness for deficiencies in their understanding.

Dr. Heiden worked in this role of a tutor from fall semester 2002 to summer semester 2006.

Univ.-Prof. Dr.-Ing. habil. Günter Brenn
